BPX TECHNOLOGIES, INC. provides Program Management Office (PMO) support for all government clients. Our company motto is “Deliverables assured through the implementation of best practices from multiple standards.” The multiple standards include ISO 9001, ISO 20000, ISO 27000, CMMI for Development and CMMI for Services. Our services include: PMO Operation and Performance support, Documentation and Planning, Performance Management and Metrics as shown below.

DOCUMENTATION AND PROJECT PLANNING SERVICES	PROJECT MANAGEMENT OFFICE (PMO) SUPPORT SERVICES	QUALITATIVE MEASUREMENTS AND PROCESS IMPROVEMENT SERVICES
DOCUMENTATION, DOCUMENT CONTROL AND RECORDS CONTROL	REQUIREMENTS MANAGEMENT	MEASUREMENT & ANALYSIS
The purpose of this process is to ensure that all processes that shall be implemented under the appropriate Standard(s) is/are documented and accountable.	The purpose of Requirements Management (REQM) is to manage requirements of the project's products and product components and to ensure alignment between those requirements and the project's plans and work products.	The purpose of Measurement and Analysis (MA) is to develop and sustain a measurement capability used to support management information needs.
CONFIGURATION MANAGEMENT	REQUIREMENTS DEVELOPMENT ENGINEERING	PROCESS & PRODUCT QUALITY ASSURANCE
The purpose of Configuration Management (CM) is to establish and maintain the integrity of work products using configuration identification, configuration control, configuration status accounting, and configuration audits.	The purpose of requirements Development (RD) is to elicit, analyze, and establish customer, product, and product component requirements.	The purpose of Process and Product Quality Assurance (PPQA) is to provide staff and management with objective insight into processes and associated work products.
PROJECT PLANNING	RISK MANAGEMENT	ORGANIZATIONAL PROCESS PERFORMANCE
The purpose of Project Planning (PP) is to establish and maintain plans that define project activities.	The purpose of Risk Management (RSKM) is to identify potential problems before they occur so that risk handling activities can be planned and invoked as needed across the life of the product or project to mitigate adverse impacts on achieving objectives.	The purpose of Organizational Process Performance (OPP) is to establish and maintain a quantitative understanding of the performance of selected processes in the organization's set of standard processes in support of achieving quality and process performance objectives.
DECISION ANALYSIS AND RESOLUTION	PROJECT MONITORING AND CONTROL	QUANTITATIVE PROJECT MANAGEMENT
The purpose of Decision Analysis and Resolution (DAR) is to analyze possible decisions using a formal evaluation process that evaluates identified alternatives against established criteria.	The purpose of Project Monitoring and Control (PMC) is to provide an understanding of the project's progress so that appropriate corrective actions can be taken when the project's performance deviates significantly from the plan.	The purpose of Quantitative Project Management (QPM) is to quantitatively manage the project to achieve the project's established quality and process performance objectives.
CAUSAL ANALYSIS RESOLUTION	VERIFICATION	PRODUCT INTEGRATION
The purpose of Causal Analysis and Resolution (CAR) is to identify causes of selected outcomes and take action to improve process performance.	The purpose of Verification (VER) is to ensure that selected work products meet their specified requirements.	The purpose of Product Integration (PI) is to assemble the product from the product components, ensure that the product, as integrated, behaves properly (i.e., possesses the required functionality and quality attributes), and deliver the product.
OTHER SERVICES	VALIDATION	SERVICE DELIVERY MANAGEMENT SUPPORT
IT System Security Support, Cyber Security Support, FedRAMP 3PAO Related Services, Earned Value Management Services	The purpose of Validation (VAL) is to demonstrate that a product or product component fulfills its intended use when placed in its intended environment.	The purpose of this process area is to make sure that services delivered are accountable per the established policies and Procedures and are verified through suitable Measurements.
